Evolution and Rationality: Decisions, Co-operation and ...

In rational choice theory, agents are assumed to make choices that maximize their utility; in evolution, natural selection 'chooses' between phenotypes according to the criterion of fitness maximization. So there is a parallel between utility in rational choice theory and fitness in Darwinian theory. This conceptual link between fitness and utility is mirrored by the interesting parallels
Evolution and Rationality : Samir Okasha : 9781107416840
