I think the fact that Paul Begala wrote this book BEFORE George W. Bush became our 43rd President, and a lot of the stuff that he predicated would happen, happened is pretty impressive. Even though an obvious partisan book, Begala cites examples and facts to back up claims instead of just criticizing Bush because "he doesn't like him." It is interesting, if for no other reason to take a quick step back in time and see what evidence was there and what we should have looked at.
