[Leibniz, Husserl and the Brain | N. Sieroka | Palgrave](#)

This book is about structural relations between phenomenological and neurophysiological aspects of consciousness and time. Focusing on auditory perception and making new and updated use of Leibniz and Husserl, it investigates the transition from unconscious to conscious states, especially with regard to the constitution of phenomenal time.

project Leibniz, Husserl, and the Brain over the past five years and for his very helpful suggestions and comments on earlier versions of this book. I would also like to thank Hans G nter Dosch for sparking my interest in Leibniz's philosophy of perception in the first place. The chapters on phenomenology have particularly benefited from careful comments from and stimulating
