Other drugs have multiple known mechanisms of action, like caffeine.

Drug Action and Pharmacodynamics - Pharmacology - Merck ...

Pharmacodynamics is the study of the biochemical and physiologic effects of drugs and their mechanisms of action on the body or on microorganisms and other parasites within or on the body. It considers both drug action, which refers to the initial consequence of a drug-receptor interaction, and drug effect, which refers to the subsequent effects. The drug action of digoxin, for example, is
