The Scrum Development Process | Scrum.org
SCRUM assumes that the systems development process is an unpredictable, complicated process that can only be roughly described as an overall progression. SCRUM defines the systems development process as a loose set of activities that combines known, workable tools and techniques with the best that a development team can devise to build systems.

What is a Scrum Development Team?

Learn About the Role of the Scrum Development Team. As described in the Scrum Guide, a Scrum Development Team consists of professionals who do the work of delivering a potentially releasable Increment of Done product at the end of each Sprint. A "Done" increment is required at the Sprint Review. Only members of the Development Team create the Increment.

Scrum Development Kit | Ken Schwaber's Blog: Telling H ...

I, Scrum.org, and our community have prioritized this problem. In 2016, we will start developing and delivering SDKs (Scrum Development Kits) that describe done increments. The SDKs will describe how to develop and put done increments into operations (DevOps). These SDKs will support different development sets, including open source.

Unzufriedenheit und auch mangelnde Wirtschaftlichkeit. **What is SCRUM Development? | Process Maturity | FAQ**

Another characteristic of Scrum is that the software development process isn't treated as a linear process, unlike the Waterfall.

Scrum development - Mountain Goat Software

The primary artifact in Scrum development is, of course, the product itself. The Scrum model expects the team to bring the product or system to a potentially shippable state at the end of each Scrum sprint. The product backlog is another artifact of Scrum. This is the complete list of the functionality that remains to be added to the product.

The Scrum Guide

The Scrum Team consists of a Product Owner, the Development Team, and a Scrum Master. Scrum Teams are self-organizing and cross-functional.
