[The Biological Basis for Mind Body Interactions, Volume 122](#)

The unique aspect of the volume is the integration of state of the art research information on biological and practical aspects of mind/brain/body interactions. It is based on the beliefs of the editors and participants that the traditional separation of mind and body in research and in treatment of human disease is obsolete and needs to be replaced with a new unifying paradigm. Ironically, this evolving paradigm shares many similarities with ancient pre-Cartesian paradigms of health and
