In *The Emergence of Meaning* Stephen Crain challenges this view, arguing that a common logical nativism underpins human language and logical reasoning. The approach which Crain takes is twofold. Firstly, he uncovers the underlying meanings of logical expressions and logical principles that appear in typologically different languages - English and Mandarin Chinese - and he demonstrates that these meanings and principles directly correspond to the expressions and structures of classical logic.

In *The Emergence of Meaning* (Cambridge University Press, 2012), Stephen Crain argues the case for logical nativism, the idea that some logical concepts are innately given and that these concepts are relevant both to human language and to human reasoning. He illuminates his argument with extensive reference to empirical data, particularly from child language acquisition, where [The Emergence of Meaning \(ebook\) by Crain, Stephen ...](#)
